# NO DECEMBER MEETING MINUTES THE 2025 CHRISTMAS PARTY

*Pictures by Bill Cooper, Jimmy Crawford, Becky Lutte, Jim Morrical*

A group of 51 EAA members enjoyed a buffet  
Of brisket, chicken, beans & potato salad.

Bingo gifts are on the left, Toys for Tots are  
On the right—3 boxfuls seen below

Organizer Keith Pache runs the show

President Joe Waltz gives the "State of the Chapter"

Every card was a winner, but the good stuff got stolen

Toys made it in time for Christmas

# ANOTHER CHRISTMAS PARTY ON THE HILL

*Photos by Joe Waltz*

Another Christmas Party was held on the "Hill" at Loren Schreck's hangar. It was catered by Joe's Pizza and featured 4 different Italian dishes and an incredible array of desserts.

The event followed the EAA Party which was held 4 days earlier. There were around 30 guests, but there was enough left-overs for lunch the following 2 days.

As usual, the diets for weight gain have already started.

## YOUNG EAGLES—2025

For the year under Dean Marcott's leadership, EAA302 flew 120 kids. That adds up to \$600 in the Chapter treasury to use for campers.

**NEXT RALLY WILL BE MARCH 21, 2026**

# WEBSITE IMPROVEMENTS

Here's a fun--yet historic--addition to your website. It now has EAA302 Newsletters back to the first one in February 1968. Just go to EAA302.org, click on "Our Chapter/Newsletters" and then "Click here for our Archive page of newsletters". Some are still missing, so if you have any, please send them to us.

Home Our Chapter Ray Scholarship Young Eagles

## Monthly Newsletter

Below is our current monthly newsletter. Our archive of newsletters can be found by clicking the below button.

Click here for our Archive page of Newsletters

Home Our Chapter Ray Scholarship Young Eagles AirVenture Store

## Welcome to the EAA 302 Newsletter Archives

Please click on a year listed below to view the newsletters for that year. We have almost all the newsletters from 2011 to present. The remaining years are sporadic. If you have any newsletters that our archive is missing, please email us at [eaa302@gmail.com](mailto:eaa302@gmail.com). We would appreciate a copy for our records.

## Homebuilders Week – Online Event Starts January 26

By Charlie Becker, EAA Homebuilt Community Manager

EAA Homebuilders Week 2026 offers 30 free virtual presentations for anyone interested in building an aircraft. Registration is required, and space is limited. The event runs Monday, January 26, through Friday, January 30, 2026. Each day features six live, back-to-back webinars starting at 11:30 a.m. Central Time and continuing every 90 minutes until the final session at 7:00 p.m. All sessions are live and include time for Q&A. To sign up, visit [www.EAA.org/HomebuildersWeek](http://www.EAA.org/HomebuildersWeek). Whether you're just beginning to explore the idea of building, are deep into a project, or preparing for test flying, you'll find sessions addressing your needs. We are also excited to have EAA President Jack Pelton joining us on January 26 to discuss EAA's advocacy efforts on behalf of our homebuilt community. EAA Homebuilders Week celebrates the anniversary of the Experimental Aircraft Association's founding on January 26, 1953. It's a great opportunity to carry on our mission by expanding your homebuilding knowledge with five straight days of learning about building and flying homebuilt aircraft. EAA Homebuilders Week is made possible thanks to the generous support of Aircraft Spruce & Specialty Co., Dynon, Scheme Designers, and Van's Aircraft. Visit [www.EAA.org/HomebuildersWeek](http://www.EAA.org/HomebuildersWeek) to register.

## Homebuilders Week Schedule January 26 - 30, 2026

### Homebuilders Week Schedule of Events

To sign up: [EAA.org/HomebuildersWeek](http://EAA.org/HomebuildersWeek)

Time CST	Monday 1/26/2026	Tuesday 1/27/2026	Wednesday 1/28/2026	Thursday 1/29/2026	Friday 1/30/2026
11:30-12:45	Building an Aircraft: What You Need to Know – Charlie Becker	Wiring Basics – Dick Koehler	Flight Testing 101 – Paul Dye	Amateur-Built Aircraft Certification Process – Joe Norris	Staying Alive: Analysis of Homebuilt Fatal Accidents – Dan Berry
1:00-2:15	Composite Construction Basics – Scott VanderVeen	Fabric Covering Basics – Austin Jones	TIG Welding – Charlie Becker & Shaun Walker	Insuring Your Homebuilt – Jim Stewart	Fly the Wing; AOA Demystified – Mike Vaccaro
2:30-3:45	EAA Advocacy Update – Jack J. Pelton, Sean Elliott & Rob Hackman	Sheet Metal Basics – Mike Dooley	Hardware for Homebuilts – Dick Koehler	Sonex Aircraft Update – Mark Schaible	Zenith Aircraft Kits & Plans – Sebastien Heintz
4:00-5:15	Getting Your Project Finished and Flying – Vic Syracuse	Dynon Avionics – Michael Schofield	Advanced Flight Systems – Rob Hickman	Garmin Experimental Avionics Solutions – Brad Breising	Weight & Balance – Joe Norris
5:30-6:45	Panel Planning and Wiring – Marc Ausman	Painting Your Plane: DIY or Use an Expert? – Craig Barnett & Ken Reese	Condition Inspections: Who & How – Brian Carpenter	Buying a Used Homebuilt – Vic Syracuse	Can Homebuilt Accident Rates Be Fairly Compared? – Ron Wanttaja
7:00-8:15	Van's Aircraft RV-15 Update – Marc Cook & Rian Johnson	Propeller Selection for Homebuilts – Steve Boser	Lessons From 200,000 Borescope Images – Mike Busch	Lycoming Engine Installation – Judson Rupert	Common Builder & Maintenance Errors – Vic Syracuse

# IMC/VMC Club

## (2nd Thursday each month)

Please join us 7:00pm Thursday, January 8th (Galaxy FBO Conference Room) to discuss the answers to these questions and video scenarios. Bring questions of your own, because we always save time for a little organized hangar flying!!

**VMC Question of the Month:** We all know that in an emergency, we can deviate from the regulations to the extent needed to deal with the emergency. According to 14 CFR § 91.3(b): "In an in-flight emergency requiring immediate action, the pilot in command may deviate from any rule of this part to the extent required to meet that emergency." Typical VFR emergency situations include:

- Engine failure or mechanical malfunction
- Fuel exhaustion
- Severe weather or visibility loss
- Medical emergency onboard
- Disorientation or navigation failure

But what if the emergency involves someone on the ground? Are we authorized to deviate from the regulations in order to assist with a true emergency involving someone on the ground, perhaps someone with a medical emergency, when other means of transport are unavailable?

### Video Scenario:

Published departure procedures for MTV require a climb of 249 feet per nm to 2,100 feet for runway 13, and 321 feet per nm to 4,300 feet for runway 31.

Scenario

3:14

VMC January 2026 - Departure in the Dark

**IMC Question of the Month:** You are planning a night cross-country flight under FAR Part 91. What are the obstacle clearance requirements, and where can you get information regarding obstacle heights?

### Video Scenario:

You complete a thorough preflight and verify that the fuel tanks are full. Noting no issues with the airplane, you start up, set the instruments and GPS, and then contact clearance delivery.

After receiving your IFR clearance for the flight to Groton, you contact ground control and receive a taxi clearance to runway 20. The runup goes smoothly, and after a short delay, the tower clears you for takeoff on runway 20.

Flight

6:06

IMC January 2026 - Late Night Pickup

# EVENTS COMMITTEE UPDATE

## Keith Pache

- 1) 7:00-8:45pm Thu. January 8<sup>th</sup> IMC/VMC Club Meeting at Galaxy FBO (see Newsletter for details).
- 2) 10:00-11:15am Sat. January 10<sup>th</sup> Chapter Meeting (Galaxy FBO).

We now meet in Galaxy FBO's building on the South Side of the Conroe-North Houston Airport. Use the South Entrance, 1<sup>st</sup> floor. Meetings start at 10:00 AM.

You cannot access the FBO by the old Airport Parkway. You need to use Loop 336 and turn at Hawthorne Drive. This road has an Airport Entrance sign which mentions Galaxy FBO and the Black Walnut Restaurant. This is just southeast of the Roller Skating Rink.

See you there.
