

EAA CHAPTER 302

Volume 5 Number 7

July 1983

Editor: Marcia Sullivan

The next meeting will be Saturday, July 9th, 10 am at Wally's Hanger.
(See, I got it all right!)

Refreshments: Spence Campbell and some last minute volunteers, including El Presidente.

Bulletin!

At the June meeting we learned that the county has approved a land lease for Chapter 302. The location and price has not been firmed up, but it may be across and east of the present (AP building. They have requested occasional use of our parking in conjunction with the JAA facility.

Hurrah!

Guess what we need now? \$ \$ \$ \$ Speaking of which, all members keep in mind the first week-end in October. That's the date of our giant Yard & Garage Sale. Dig out your trash and Treasure and get ready to work.

.... The Crockett Bash was reported to be a "goodie" by Chapter attendees, Mike, John, Kieth, Byrdell, and "Jack" and "Angel" Aldrich.

...Notice: A lonesome pie tin and an orange flashlight remain unclaimed from the fly-in. Owners can collect them at the meeting.

... Looking for a ride: Mike Ferguson is available to fill a seat to Oshkosh and stay 2 or 3 days. If you have one, call him at 756-0037, nights-344-6280.

For Sale:

Nothing.

...but, you could probably get one of the remaining six black lab puppies for free!

For Rent:

Hanger Space-in Wally's Hanger \$175.00 per mo.

Chapter Notams

.... 302 has voted to donate \$500 to the new Eaa Headquarters and Museum now under construction in Oshkosh and earn a place on the wall.

.... A recent FAA Advisory states that all inspections on homebuilts up to the final inspection can be done by an A&P. See Hurley or Lou for details. Also be aware that these two members also offer 100 hour inspections and annuals to chapter members at a discount.

.... 302 has voted to put up two flagpoles for Montgomery County Airport.

.... A helping hand never hurts: Airport Board Chairman has thanked 302 for repairing the Varieze of a transient pilot. The aircraft was inadvertently damaged while being parked in a hanger.

.... A nice letter from Merlin and Betty Vollman whose Skybolt placed in the April Fly-In. They said that they had attended our first Fly-In last year "and were quite impressed with how organized you were and the friendliness of your members. We came home and bragged on you to our members."

.... Interesting article on Loran C in light aircraft from Chapter 187 via Chpt 595. It will be posted at the meeting for members perusal.

More Notams

.... The dedication of the new Eaa Headquarters and Aviation Center will be July 30th, just before the opening of Oshkosh '83. Another good excuse to go this year!

.... Leave it to the press: A recent news article concerning an airplane transporting some "funny" stuff refered to a "Beechnut" Queenaire. Good chewing gum ad, maybe.

.... Say Again: a term used by deaf pilots when conversing with spastic controllers.

.... Stability: mental condition, rare among pilots

.... Short Field Landing: any landing that terminates short of the last taxiway.

.... Remember the lawn-chair pilot? The FAA has determined, in their great wisdom, that the flight was basically legal. His vehicle was classified as an ultralight, making an airworthiness certificate unnecessary and the alleged collision hazard was dismissed. His fine for endangering life and property was reduced to \$1500, which was effectively dealt with when Walters (the pilot) declared bankruptcy. Lawnchairs, anyone?
